DETAILED ACTION

Response to Amendment

1. Applicants' amendment of claims 1, 4, 25, and 26 in the reply filed on June 23, 2006 is acknowledged.
2. Applicants' cancellation of claims 16-24 in the reply filed on June 23, 2006 is acknowledged.
3. Applicants' addition of claims 28-33 in the reply filed on June 23, 2006 is acknowledged.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, 25, 26, and 29-33, drawn to a corneal implant comprising a hydrated membrane or a method for using said implant, classified in class 623, subclass 5.11.
 - II. Claims 27 and 28, drawn to a commercial package comprising a corneal implant, classified in class 264, subclass 1.7.

The inventions are distinct, each from the other because of the following reasons:

5. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 3738

claimed because the membrane does not require to be hydrated. The subcombination has separate utility such as a corneal implant supplied (packaged) in a pre-hydrated state (i.e., there is no need for a re-hydration solution).

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
